Properties of Essential Oils

Natural long
standing microdroplets

Nebulizing diffusers does not require water or heat to distribute essential oils into the air. This may make them more advantageous than other types of diffuser.

① Product Description

About PlusVibes' Wireless Travel Nebulizing Diffuser

PlusVibes' nebulizing diffuser is light, slick and travel-friendly. The rechargeable wireless device allows you to diffuse essential oils effortlessly during your yoga session, on your office desk, on your bedside table and even in your car. A nebulizing diffuser is often used for aromatherapy for overall well-being, stress relieving and sleep aid. This nebulizing diffuser adopts a cold diffusion technology, converting essential oil into micro fine vapour without using heat or water. The nano atomization technology protects essential oil molecules to maintain its therapeutic properties.

Components

- Aluminium Alloy Body, Metallic Frosted Texture
- USB Charging Port
- Built-in 2200mAh High-Capacity Lithium Battery
- Mirror Smart Buttons
- Vertical Nano Mist Outlet with Timer

What is a nebulizing diffuser for?

Nebulized therapy is often called a breathing treatment that can be used to improve respiratory systems or assist in guiding an individual into a state of relaxation. A nebulizer transforms liquid into a micro fine vapour, allowing your lungs to easily absorb the therapeutic benefits of the oil. A nebulizing diffuser does not require a water base so there is no need to keep refilling water like a humidifier or aroma diffuser.

Application

1. Bedroom, living room, dining room, study room
2. Office / Study desk, meeting room
3. Yoga mat, gym
4. Inside car
5. Bathroom, bath tub

② Operation Instructions

The control panel has 3 intensity and 3 timers.

Intensity Atomization:

Low intensity: Atomize 15s and rest 165s, oil consumption 0.15ml/hr

Medium intensity: Atomize 60s and rest 120s, oil consumption 0.6ml/hr

High intensity: Atomize 120s and rest 60s, oil consumption 1.2ml/hr

- To turn on device: Press Power button for 3 seconds
- To turn off device: Press Power button for 3 seconds
- To change the intensity: Select the intensity by pressing the intensity button
- To change the timer: Select the hour duration by pressing the Power button

Continuous Timer Mode:

The nebulizer will diffuse according to the selected intensity for either 1 hour, 2 hours, 3 hours or no timer.

Charging Precautions:

Use the charge of output voltage DC5V, PC computer USB port, mobile charger with USB port or car charger with USB port.

When fully charged for 6 hours, able to use for 72 hours, 16 hours, or 8 hours (according to intensity and timer.)

When charging, the LED light on the panel will blink and become solid red when fully charged.

Over-charging of this device will result in decreased battery efficiency over time, which is normal for rechargeable batteries.

③ Set Up Guide

- Connect charger to 5V adapter (not included), full charge for 6 hours. View Operation Instruction: Charging precautions (page 6).
- Press the nozzle top, it will eject an empty 20ml bottle.
- Unscrew the bottle from the nozzle and add in a few drops of pure essential oil. You may add different scents to create a blend suited for you.
- Once filled, do not topple the device as it will damage the device.
- View Safety Rules (page 11).
- To insert the nozzle into the device, ensure that the arrow is aligned, and press firmly.
- To begin diffusing, view Operation Instructions (page 4)

1. Press the mist head, it will pump out

2. Align the arrow on the mist head, and press firmly to install.

④ Technical Specifications

Model: CS-10X

Capacity: 5-20ml

Voltage: DC-5V

Power: 1.5W

Battery capacity: 2000mAh

Battery (max): 72 hours

Product size: 71.5mm x 121mm

Product weight: 370g

Product size: Refer to image

⑤ FAQ

1. How long does it take to fully charge the battery?

It takes 6 hours to fully charge and can be used up to 72 hours, depending on diffusing intensity.

2. What kind of oil does the nebulizer need?

Pure essential oil without impurities. Do not add water as it will spoil the device.

3. Why can't I see the mist?

When the nebulizer is on, the essential oil will become nanoparticles and sometimes cannot be seen by the eyes.

4. Why does the nebulizer suddenly stop diffusing?

The nebulizer does not continuously diffuse the oils. It diffuses according to intensity with up to 165 seconds pause in between diffusing. View Operation Instructions: Intensity Atomization (page 4)

⑥ Safety Rules

1. Do not overturn the nebulizer or leave the nebulizer on its side while oil is inside. This may cause the oil to flood the air pump and may cause permanent damage to the nebulizer.
2. Do not dilute oil with water. Only use pure essential oils in the nebulizer.
3. Do not leave this product under direct sunlight or heat as it may damage the device.
4. When changing essential oil, turn off the power switch.
5. Keep out of reach of children and pets.

⑦ Cleaning Instructions

1. Press and pull the mist head from the nebulizer.
2. Take out the amber bottle attached to the mist head, and pour rubbing alcohol (75%) into the amber bottle. Gently swoosh it around and rinse with water.
3. Rinse the tube with cold or room temperature water gently while avoiding the mist head.
4. Wait 15-20 minutes for the bottle and tube to dry.
5. Assemble all the items accordingly and you are ready to diffuse.
